The contents of this directory reflect the WESTCAS membership roster as of September 21, 2011.

ABOUT WESTCAS

Protecting water and the environment in the Arid West.

The Arid West has a unique ecosystem. Many months have no rain and annual precipitation often less than 12 inches. Consequently, it is essential to protect both the quantity and quality of water supplies.

To this end, in 1992 the area's water and wastewater providers joined together to share their talents and resources, assuming the name Western Coalition of Arid States or WESTCAS.

A grassroots organization, WESTCAS is dedicated to encouraging the development of water programs and regulations which assure adequate supplies of high quality water for those living in the arid regions while protecting the environment. WESTCAS has current members in the following states: Arizona, California, Colorado, New Mexico, Nevada, Tennessee, and Texas.

WESTCAS VISION

Sustainable Water Quality and Quantity in the Arid West.

WESTCAS MISSION

To be:

- The premier grassroots organization for the providers of water, wastewater, and reclaimed water services in the Arid West.
- A responsible coalition on behalf of our members and their customers.
- A reliable source of information about water quality issues to our members and the public.
- An advocate for environmentally sound management of water resources and the protection of public health.
- A contributor to policy, regulations, science, legislation, and appropriations on Arid West water issues.

WESTCAS GOALS & OBJECTIVES

GOAL 1:

Advocate laws, regulations, standards, and policies that provide for environmentally sound science based protection and wise use of water resources in unique Arid West ecosystems.

Objectives:

- Promote research and technologies to develop new and existing water resources, including reuse.

Initiate actions to ensure drinking water regulations and standards are based on sound science and are appropriate for the Arid West.

- Initiate actions to ensure surface water regulations and standards are based on sound science and are appropriate for the Arid West.
- Influence reauthorizing or reforming Federal laws to ensure environmentally sound science based protection and wise use of water resources in unique Arid West ecosystems.

GOAL 2:

Actively champion Federal funding for water quality and quantity issues, programs, and infrastructure in the Arid West states.

Objective:

Ensure adequate Federal financing for sustaining water resource infrastructure in the Arid West.

GOAL 3:

Ensure WESTCAS remains effective as the Voice of Water Quality in the Arid West.

Objective:

Enhance the value of WESTCAS membership to increase participation of current members and to attract new members.

OFFICERS

President

Ed Curley
Strategic Planning Manager
Pima County Regional Wastewater
